PROFILE

I aspire to become a highly skilled front-end developer, even though I'm at the beginning of my career. Besides having a strong foundation in various programming languages, I can quickly adapt to new technologies and embrace changes.

As a front-end developer, I am committed to continually improving myself. My goal is to contribute to innovative projects and enhance the user experience. I believe that my collaborative abilities and my willingness to learn will make me a valuable asset to any team.

EDUCATION

Eskişehir Osmangazi Univercity   10/2021 – 09/2023
Computer Programming / GPA 3.67 / 4

EXPERIENCE

UI Developer Intern at Jotform   07/2023 – 08/2023
- I worked as a UI developer on a project involving an AI-powered assistant where   Remote
  Jotform users can ask questions and receive answers within a team comprised of
  interns.
- I used React while developing.

PROJECTS

Next.js Blog Site 🔗
I used App Router for page routing and I used the OAuth authentication feature of the Auth.js library for user authentication. I also used CSS modules, Prisma, and MongoDB.

PHP Blog Site 🔗
It's a blog site that I made on Bootstrap ready theme and I use PHP and MySQL database.

C# Admin Panel 🔗
An admin panel I created for a gym, using MySQL database to store members' information

SKILLS

React | PHP | MySQL | Next.js
